

## Meet the Next Generation of Topless Glass Railing Systems... **PUP Post**

***A single, multi-functional, post...  
nearly LIMITLESS options!***

- **Choose Your Post Position:** A revolutionary single, multi-functional post with a triple-channel design enables a single post to function as either an in-line, corner or end post.
- **Choose Your Angle:** Multi-function insert component allows for a 60° angle variance so you can adjust to the shape to virtually any space. Even if you need to “bend” your glass around a corner...no problem!
- **Choose Your Mounting Style:** traditional surface mount or fascia mount, the choice is yours for the best match to your decking system.
- **Choose Your Glass Style:** the tempered glass panels can be clear for view-through railings, frosted for privacy, or any combination of both.
- **Choose Your Height:** whether you want your glass at post height, just proud of the post for added decor, or extended height to provide a wind or privacy screen; PUP Post enhances your environment. The multi-function channel insert even allows you to adjust the position of where the glass sits for custom projects and a standard 3" gap from deck to glass allows for easy cleaning and snow removal.
- **Choose Your Look:** if you prefer the look of a continuous top rail over the sophisticated look of a topless glass system, you have the option of adding the *XPLR Top Rail*, but still keep the bottomless railing look for your view.

**Shape, Size or  
Style Versatility...  
PUP Post  
provides it.**

***Deck Railings • Privacy Screens • Wind Screens  
Pool Surrounds • Fencing***
